DUDLEY ROAD EAST - OLDBURY – WEST MIDLANDS – B69 3EB

Belt Conveyors come in a wide variety of shapes and sizes. They are extensively used for handling waste products. It is Marwel's experience that waste conveyors need to be carefully designed to suit the product being handled.

Impact loads need to be calculated and belt cross supports incorporated if needed.

Waste conveyors need to be of a rugged construction to withstand the arduous conditions they will always experience.

Special two tier conveyors can be supplied to distribute the waste or fill individual skips.
