DUDLEY ROAD EAST - OLDBURY – WEST MIDLANDS – B69 3EB

Marwel Conveyors manufacture a range of conveyors suitable for handling hot forgings.

Inclined conveyors elevate the forging and the scrap. The scrap is automatically separated inside the discharge chute and directed to a scrap bin.

The chain can be continuous piano hinge slat belts, multiple heavy duty chains or to a special design.

All conveyors are designed and built for heavy duty Use and to withstand the arduous conditions that will be met in service.
