MARWEL CONVEYORS HAVE DESIGNED SYSTEMS USED IN THE POTTERY INDUSTRY.

THIS LEAFLET SHOWS EXAMPLES OF A CONVEYOR SYSTEM USED TO KEEP A FURNACE RUNNING 24 HOURS PER DAY. THE PLATTENS WERE LOADED DURING A NORMAL DAY AND BUFFERED ON THE RACK CONVEYORS.

THE PLATTENS WERE THEN AUTOMATICALLY FED INTO THE FURNACE DURING THE NIGHT AND THE FIRED POTTERY WAS COOLED ON THE BUFFER RACK CONVEYORS.

ALSO SHOWN IS A PROPOSED CONVEYOR FOR THE SPINNING AND PAINTING OF PLATES.
